Little Soldiers

In your blood are the millions of corpuscles that defend you against attacks of disease.

To make and keep these little soldiers healthy and strong, is simply to make and keep the blood of the right quality and quantity.

This is just what Hood's Sarsaparilla does—it helps the little soldiers in your blood to fight disease for you.

It cures scrofula, eczema, eruptions, catarrh, rheumatism, anemia, nervousness, dyspepsia, general debility, and builds up the whole system.

It effects its wonderful cures, not simply because it contains sarsaparilla, but because it combines the utmost remedial values of more than 20 different ingredients. It is urged to buy any preparation said to be "just as good" as Hood's Sarsaparilla, is inferior, costs less to make, and yields the dealer a larger profit.

Its many evils. The chief gave a good plain talk in his characteristic style, and described the numerous temptations which allure young people into by-paths of evil and wrong-doing. His first hand knowledge makes him an authority on topics of this nature and he is using all his influence to bring about a better condition among the young people of the city.

CRUSADE AGAINST VICE.

OGDEN, Feb. 21.—There is a determination on the part of the police department to rid Ogden of much of its "undesirable" element and frequent arrests during the last few days of numerous colored women of the underworld is one evidence of this crusade. These women are held on vagrancy charges and will be given instructions to leave the city permanently. A few nights ago, a Jap was robbed of a large sum of money, a few arrests have been made of really hardened criminals, and the officers feel that the city is unusually free from the hold-up and foot-ped element.

The Farmers' Co-operative and Educational Union of North America, has expired, and the mills will probably be sold to the highest bidder. Mr. Bearup may succeed in organizing a company to bid on the mills. However that may be, he states that the plans of his organization for bringing the producer and the consumer together—referring to woolen manufacturing and consumption—will be carried through and a plant for manufacturing somewhere in the west.

It is reported that another plan is under way to induce people to secure control of and operate the mills.

TO RESTORE LAND.

PROVO, Feb. 21.—A movement is now under way to have a large tract of land at the south end of Utah lake restored to the government. The land was withdrawn by the government years ago when the project of making Utah lake a reservoir under the reclamation was under consideration. This has now been abandoned and there seems to be no reason why the land should not be made subject to entry. Several thousand acres of the land in question is said to be excellent fruit land, and the rest of it is adapted for dry farming. It is proposed to irrigate the fruit land with water pumped from Utah lake.

It is supposed a match or lighted cigarette or cigar had been dropped through the sidewalk, which covers the basement, or carelessly thrown through an open window. The building joins the Lamar hotel and other buildings on Academy avenue.

from Salt Lake last September, and has since worked at different places in the country, reported Friday morning that he had been robbed of a small amount of money while asleep in his room at the Charlotte House in Spanish Fork. After their sentences expire they are going to Salt Lake, where they understand from reading the papers there is plenty of work.

WYOMING.

POISONED FROM EATING SALT LAKE CANDY

(Special Correspondence) ENCAMPMENT, Wyo., Feb. 18.—That Thomas Madden of this place, who died under suspicious circumstances several days ago, was killed by corrosive substance, and that the poison was contained in a piece of candy from a factory in Salt Lake, is the conclusion of the coroner's jury which investigated the case. Madden became ill shortly after eating a chocolate sent from a box which had been purchased by his daughter at a local store. The remainder of the candy was eaten by other persons, none of whom was affected, although Mrs. Madden spat out and refused to eat a chocolate cream like that which is believed to have caused the death of her husband. She states that it tasted bitter. As the seals on the package of candy were intact until broken at the Madden home, it is supposed the poison found its way into the chocolate at the factory.

HUMANE SOCIETY OUT WITH BIG STICK

Stockmen Who Allow Horses and Cattle to Starve to be Prosecuted.

(Special Correspondence.)

LOGAN, Feb. 19.—Sheriff Crookston and his deputy Fred Smith have been out the past day or two investigating the treatment accorded horses and cattle belonging to residents of this city, and which are being kept in the bottoms below town. The result is that several complaints will likely be filed within the next few days against the owners, as the animals are in a terrible condition, being scarcely able to stand, and are huddled together slowly starving to death. There has been a good deal of this sort of thing practiced but the humane committee of the Boosters' club, of which the sheriff is chairman, has taken the matter in hand and prosecutions on a wholesale scale unless owners get food to their stock.

SUITS FILED.

LOGAN, Feb. 19.—Maretta S. Ormsby of Salt Lake City has filed suit in the First district court against Joseph S. Petersen, to obtain possession of two notes, one for \$100 and the other for \$200, which she alleges have been paid and are withheld wrongfully by the defendant. She also asks for \$200 damages.

Anna E. Bar has filed suit in the same court for divorce from Frederick W. Bar, alleging failure to provide. The couple were married in Germany many years ago and after having reared a large family agreed to separate, and securing a divorce they lived apart for a time but finally married in 1908. They did not live together more than a few months, however, and now are desirous of another divorce.

SHREDDED WHEAT

It is a better substitute for meat than vegetables, because it is rich in muscle-making, brain-building material. It contains more body-building nutriment than meat or eggs. It costs much less, always the same price—always clean—always pure—always wholesome. Your grocer sells it.

Shredded Wheat Biscuit is made of the whole wheat, steam-cooked, shredded and baked in the cleanest, finest food factory in the world. It is ready-cooked, ready-to-serve. Two Shredded Wheat Biscuits heated in the oven to restore crispness, and eaten with a little hot milk, and salted or sweetened to suit the taste, will supply all the energy needed for a half-day's work. If you like it for breakfast, you will like it for any meal in combination with vegetables, baked apples, sliced bananas, stewed prunes or other fruits.
